

N^oICE CREAM LAB
TASTY CHEMISTRY

BESPOKE POP UP EXPERIENCE.

How It Works?

1. Choose your flavour or flavours on **page 3**. (or we can create an epic unique flavour that suits you best!)
2. We come to your event, launch, wedding or party with our trained Brrr-istas to create ice cream magic.
3. It takes us less than 60 seconds to make actual ice cream. What does this mean you ask? Not only does it look cool. It tastes amazing because every ice cream is freshly made.

Our Services

- Custom Branded Bar option to fit into your event
- Trained Brrr-istas to create and serve ice cream to your guests
- Custom flavour creation
- To create an unforgettable experience

It's that simple.

Go Ahead. These flavours don't bite.

Our Ice Cream is made from one key ingredient called Liquid Nitrogen – or **LN2** as it's known in science circles. It is odourless and tasteless. It's non toxic and it's completely safe to eat.

Periodic Table of Flavour
